

## KEY INDICATORS

With 2,944,904 hectares, Spain had the largest organic farmland area in the European Union, after France. In terms of organic area share, its 12.1% share was slightly above that of the European Union. Growth from 2001-2024 was almost sixfold and thus higher compared to most EU countries. With 2,724 million euros, in 2024 Spain had the fifth-largest market in the European Union. 3.3 percent of all food sales were organic.

## CAP ORGANIC POLICY SUPPORT

The Spain CAP strategic plan provides for a 20% increase in supported organic area and expenditure by 2027 compared with 2018, when less than half the certified organic area was supported, due mainly to regional differences in support. Planned maintenance payments from 2023 are reduced, in some case substantially, or similar to the previous period. Conversion payments are either similar to maintenance or higher by 10 or 20% depending on region in both periods. As a result of the planned reductions in payments per ha, total expenditure is planned to be 6% higher and average expenditure per ha to fall by 12%. A substantial proportion of certified organic production could remain unsupported. It was not possible to update the policy support data in 2025.

### CONVERSION & MAINTENANCE

	2018	2027
<b>Land Area Supported (Change from 2018)*</b>	1,045 kha	1,257 kha (+20%)
<b>Share of Total Agricultural Area Supported*</b>	4.3 %	5.1% (+19%)
<b>Share of Certified Organic Area Supported (Change)*</b>	47%	N/D
<b>Expenditure per Year*</b>	159 M€	169 M€ (+6%)
<b>Expenditure per Hectare Supported*</b>	152 €	134 € (-12%)

### SHARE OF CAP RESOURCES

### CAP EXP. 2023-2027 ORGANIC SHARE\*

<b>Organic Farming Support (P2)*</b>	819 M€	100%
<b>Eco-Schemes (P1)</b>	5,553 M€	11.1%
<b>Agri-Environment, Climate, Welfare (P2)</b>	1,837 M€	
<b>Total CAP Expenditure</b>	34,169 M€	2.4%

	2023	P2	0-20%	0-20%	0-20%	0-20%	0-20%	0-20%

Ranges shown as significant variations within category by region, crop and irrigation

Fund: P1(Pillar 1) European Agricultural Guarantee Fund (EAGF); P2 (Pillar 2) European Agricultural Fund for Rural Development (EAFRD) and national co-financing

## NATIONAL ORGANIC ACTION PLAN

Spain has no current national organic action plan. Although one was anticipated in late 2023, it did not materialise following the elections that year. Some regional action plans exist or have existed, illustrated here by an example from Andalusia. In 2020, Andalusia accounted for 1.1 Mha, or 45% of Spanish organic land area.

### TARGETS

	PERIOD	LAND AREA TARGET	OTHER TARGETS
Previous Action Plan	2016-20	None	None
Current Action Plan	None	None	None

### KEY ACTIONS

#### PREVIOUS ACTION PLAN (ANDALUCIA)

#### CURRENT ACTION PLAN (NONE)

Key Action	Category	Status
Consolidate growth; strengthen financial and environmental performance; support for aquaculture; support for women's engagement in organic farming including property rights	PRODUCTION	No current plan
Investment aids for farm improvement, young farmers, processing; improve marketing, supply chain development, producer groups; support consumption in schools, social institutions, restaurants and catering; strengthen control system, Council for Organic Production and SIPEA information system	MARKETS	No current plan
Improve knowledge of production methods; support consumption and non-commercial horticulture; develop advisory services, technical publications and web platform; develop training for advisers, farmers; specific studies on technical problems, sustainability and financial performance, technical support for monitoring, evaluation of action plan; support for price and market data in CAPDER observation centre	INFORMATION	No current plan

### AQUACULTURE

The organic share of total aquaculture production in Spain was 2.7% in 2020. Spain provided support for organic aquaculture, including conversion and certification, processing, promotion and packing, as part of the EMFF (2014-2020) and EMFAR (2021-2027) operational programmes and the Multi-annual National Strategic Plan for Aquaculture. As the funding is project specific and there is no ring-fenced organic budget, statistics on organic aquaculture support expenditure are not available.
